

INTERCEPT *Free*® with RezTak™

ADVANCED COMPRESSION FIT FINGERTIP DESIGN

TEXTURED
FINGERTIPS

THE COMPRESSION FIT ADVANTAGE

Our patented compression fit glove design reduces stretching with a better fit in the palm and contoured fingertips. Uniform dipping helps to create a stronger glove at the stress points. The contoured fit makes performing intricate tasks easier with better grip and tactile sensitivity. Compare the fit to other traditional single-use gloves and you will feel the difference.

Intercept Free gloves protect the user and patient because they are manufactured without accelerator, sulfur and zinc, which can cause skin irritations. The bright safety green interior helps the wearer to easily tell if the glove has been compromised. Intercept Free is UL tested and NFPA approved.

PRODUCT FEATURES

- Fentanyl, heroin and gastric acid permeation tested per ASTM D6978-05 (2019) standard for protection up to 240 minutes
- Powder-free nitrile examination glove
- 8.0 mil fingertip (.20 mm +/- .03 mm) and 5.5 mil palm (.14 mm +/- .03 mm)
- 12" length
- Two-tone color—bright white with safety green interior
- Ambidextrous, single-use, non-sterile
- A non-stick outside surface, RezTak, helps eliminate sticking of adhesive tapes
- Not made with natural rubber latex
- Meets or exceeds NFPA 1999-2018 standard

PACKAGED

- **Small-2XLarge:** 100 pcs/box by weight
- **3XLarge:** 90 pcs/box by weight
- 10 boxes per master carton
